

SL2™ Connector

Seamlessly integrated with multiple Microsoft Compliance Solutions

SL2 is seamlessly integrated with Microsoft Teams, Microsoft Endpoint Manager (Intune), and the Microsoft 365 E5 enterprise solution. Mobile communication data captured by SL2 are sent to Microsoft 365 E5 user mailboxes via the SL2 Connector, where Microsoft Purview Data Lifecycle Management, Advanced eDiscovery and Communication Compliance features can be applied for our joint customers.

Archiving with the CellTrust SL2™ Connector: Text, chat, and voice are valued and productive channels requiring compliance oversight and governance. A Microsoft 365 E5 license is required. Microsoft Intune or Microsoft Teams licenses are optional.

Key Benefits:

- Mobile data capture
- Integrated Microsoft Compliance
- Archive and retention
- Advanced information governance
- Advanced compliance oversight
- Advanced eDiscovery
- BYOD/CYOD/COPE applicable
- SL2 dedicated Mobile Business Number™
- Separates personal and work data
- Protects staff privacy
- CellTrust onboarding

Increase mobile productivity while minimizing compliance risks

SL2, combined with Microsoft Compliance solutions and Microsoft Endpoint Manager (optional), enables your staff to work wherever they are. Knowing they can engage with stakeholders via text, chat or voice (optional) on their personal or corporate device and remain compliant within regulatory guidelines - drives mobile productivity.

Govern and enforce robust regulatory compliance

Compliance teams within highly regulated industries can now balance mobile productivity, risk, and control on BYOD, CYOD and COPE device scenarios. SL2 captures work related SMS, MMS, WhatsApp, SL2 App to App chat, and voice (optional) data and sends it via SL2 Connector to Microsoft 365 for archive, advanced Microsoft Purview Data Lifecycle Management with oversight for enforcement of regulatory compliance (Dodd-Frank Act, GLBA, SOX, FINRA, SEC, FCA, MiFID II, FOIA, Sunshine Laws, Public Records Laws, HIPAA, TCPA).

SL2 is available in Azure Global and Azure Government cloud

SL2 was developed on Microsoft Azure and is available in Azure Global and Azure Government cloud. Microsoft Azure Government is the mission-critical cloud, delivering breakthrough innovation to US government agencies and their partners. Only US federal, state, local, and tribal governments and their partners have access to this dedicated instance, with operations controlled by screened US citizens. Azure Government offers the broadest level of certifications of any cloud provider to simplify even the most critical government compliance requirements, i.e., FedRAMP, NIST 800.171 (DIB), ITAR, IRS 1075, DoD L4, and CJIS. To provide the highest level of security and compliance, Azure Government uses physically isolated data centers and networks located in the USA.
