

SL2™ for Microsoft Endpoint Manager

Empowering compliant BYOD/COPE across 100+ countries

CellTrust SL2™ is integrated with Microsoft Endpoint Manager to separate personal and business communication via a Mobile Business Number™ (MBN) to provide a compliant mobile device solution, manage cybersecurity across their mobile device network and avoid data loss. SL2 provides enterprise level compliance enablement and recordkeeping for BYOD/COPE within the highly regulated financial services, government and healthcare industries. SL2 operates in the Microsoft Endpoint Manager container on IOS® and Android® utilizing customized features to allow organizations to tailor it based on their industry needs.

SL2™ Key Features:

- Capture text and/or voice communications
- Integrated with WhatsApp
- One device for work and personal
- True Group Messaging
- Integration with leading archivers
- Clients don't need an App
- Range of templates and policy options
- Customizable Consent configurations
- Available with leading UEMs
- Increased data security
- Integration with CRM and email
- Mobile Business Number™ (MBNs)
- Office landlines can be integrated
- Bulk contacts from CSV, vCard, Salesforce®
- Office 365/Exchange contact syncing
- SMS prescheduling
- SMS out-of-office/auto-reply
- API for SL2 platform available
- Available on iOS and Android devices, including iPads and tablets
- Integrated with AppConfig
- Enterprise ready for easy onboarding and reporting

Seamless and secure from mobile to desktop. Access CellTrust SL2 via browser on any device for both messaging and calling. You can use one device to send and another to respond simultaneously.

Member of
Microsoft Intelligent Security Association

Compliance team has comprehensive supervision

The SL2 dashboard provides your compliance team with an easy to deploy and configure platform. They can set and change rules and policies, correlate and supervise voice, text and chat activities for enforcement, traceability and eDiscovery.

Office landline numbers can be text enabled and integrated

Smartphones are perfect for texting, but often Advisors need to manage all their client communication while in the office from their desktop. SL2 on the desktop is intuitive and user-friendly, making communicating both inside and outside your organization a snap. Integrating voice, text and chat seamlessly and compliantly at your fingertips, SL2 makes every business number textable. The voice functionality of the landline and current service provider remains the same and can be activated in association with an existing or new landline desk phone number.

SL2 helps Financial Advisors to compliantly engage with clients when and where they feel most comfortable by separating personal and business activity on the same smartphone.

CellTrust Global Mobile Business Number™ (MBN) Country Coverage

CellTrust supports customers with domestic and international phone numbers on the same phone that all ring globally, with messaging capability across the world (where available).

Easily integrates with the leading archiving technologies

CellTrust delivers out-of-the box integration through strategic partnerships with the leading global Enterprise Information Archiving (EIA) technology providers to manage, validate, trace and archive SMS/text, chat, voice (optional) and multimedia messages in support of eDiscovery and regulatory compliance.

Reach out so that our experienced team can demonstrate how our market-leading mobility solutions can empower your enterprise with secure, compliant BYOD, CYOD and COPE mobile communications. Let's get started! **+1-480-515-5200**, sales@celltrust.com or www.celltrust.com/SL2
