CELLTRUST®
SECURE & COMPLIANT MOBILE

# SL2™ for BlackBerry® Dynamics™ Compliant Mobile Communication

Empowers compliant BYOD/COPE across 100+ countries

CellTrust SL2™ is integrated with BlackBerry® Dynamics™ to separate personal and business communication via a Mobile Business Number™ (MBN). SL2 provides enterprise level compliance enforcement and reporting for BYOD/COPE within the highly regulated financial services, government and healthcare industries. SL2 operates in the BlackBerry® container on IOS® and Android® utilizing BlackBerry® authentication, encryption, policies and is also integrated with the BlackBerry® contact list.

SL2 secure platform delivers a traceable and seamless experience across multiple digital touchpoints and the preferred communication channel. SL2 can also enable landlines for texting. Clients only have one number to call or text and do not need the SL2 app on their phone. Users in 100+ countries, count on CellTrust SL2 to capture and protect their mobile communication.

Seamless and secure from mobile to desktop. Access SL2 via browser on any device for both messaging and calling. You can use one device to send and another to respond simultaneously.

Lays the foundation for secure enterprise mobility

BlackBerry® Dynamics™ and SL2 Enterprise Capture provide your IT and compliance team with an easy to deploy and configure platform. They can set and change rules and policies, correlate and supervise voice, text and chat activities for enforcement, traceability and e-discovery.

Together, CellTrust and BlackBerry® deliver a complete mobility solution for enterprises to holistically take control of their devices, applications and mobile communications. This plan features SL2 secured by BlackBerry® license SMS with a US phone number (MBN – Mobile Business Number) for text messaging (SMS/MMS), the secured by BlackBerry® license for BlackBerry® UEM containerization and integration with BlackBerry® UEM contacts and Microsoft 365 Exchange contacts. Group Conversation and CellTrust Container Services are included.

SL2 helps Financial Advisors to compliantly engage with Clients when and where they feel most comfortable by separating personal and business activity on the same smartphone

Easily integrates with the leading archiving technologies

CellTrust delivers out-of-the box integration through strategic partnerships with the leading global Enterprise Information Archiving (EIA) technology providers to manage, validate, trace and archive SMS/text, chat, voice (optional) and multimedia messages in support of eDiscovery and regulatory compliance.
